

## Wilderness Restoration: Saline Valley

Excerpt's from Audrey's field notes:

The road before.

The road after.

**Date:** June 24-June 26, 2002

**Weather:** O my gosh-Hot! Early mornings were pleasant, but terrible winds at night.

**Mood:** Excited. This place was a new experience, but I was freaked out since there was no showering for two days!

Audrey & Valerie working.

**Objective:** Wilderness restoration of old roads that are now wilderness and to prevent public use.

**Description of Work:** We raked up tire tracks and dug holes where we planted mesquite brush. The pits were used to spread creosote seeds in order to speed up the growth process.

**Feelings:** Our hard work made a huge difference. Not only was the project a success, but we all had fun and were proud of the results.

Our mascot Stanley.

**The Crew Working.**

**The Crew and Tim after.**
